## Projects

**Shopware Ecommerce Dashboard** : Developed a comprehensive e-commerce dashboard using React and Syncfusion UI components library. Integrated four versatile apps, including a text editor, color picker, Kanban board, and more. Enhanced data visualization through 6-8 different chart types, such as pie charts, to provide insightful business analytics.

**CryptoArea** : Developed a dynamic crypto app showcasing real-time prices and rankings of exchanges and coins. Utilized Three.js to create a 3D Bitcoin model for the hero section, and implemented React and CoinGecko API for real-time data integration. Employed Chart.js to display data through interactive graphs, enhancing user experience and data insights.

**Movix** : Developed a dynamic movie website using React.js and The Movie Database API. The platform provides comprehensive details about movies, including genre and cast information. Users can search for specific movies and watch trailers directly on each movie page, enhancing their browsing and viewing experience.

**Gemini 2.0** : Developed a chatbot application resembling Google Gemini using React and the Gemini API. This project leverages advanced conversational AI to deliver responsive and interactive user experiences. Key features include natural language processing, context-aware responses, and seamless integration with various services, providing users with a seamless and intuitive chat interface. The chatbot is designed to handle a wide range of queries, enhancing user engagement and satisfaction.

## EDUCATION

### Bachelor of Science in Computer Science

*University of Education, Lahore*

*Expected Graduation: August, 2027.*

*Skills : C++, Object-Oriented programming*

## SKILLS & INTERESTS

**Interests:** Business & Startups, TED Talks, Udemy, Development, Programming, SaaS

**Languages:** Native Urdu and Fluent English

**Technical:** HTML, CSS, JavaScript, C++, Node JS, MongoDB, Git & Github, React

**Tools & Libraries:** Tailwind CSS, Bootstrap, Syncfusion UI, Chart.js, Figma
