

# Muhammad Abdullah

## Profile

A data enthusiast with the passion of diving into the big blue ocean of data and indulge myself in solving its mysteries to solve real world problem is what I would want to become, and as the time passes by I am reaching my goal with the progress I made doing real world projects that include self-paced projects and client-oriented projects. I am a university undergraduate student with the aim of becoming an independent person in my studies. I worked in a call center which required great communication skills which helped me grow as a data professional and tell stories from data.

## Junior Data Scientist

maabdullah.rhs@gmail.c

03195125669

Lahore, Pakistan

## Employment History

### ML Engineer at Freelancing

05/2023–07/2024

Created a model that would analyze comments on women clothing products sold on Amazon. The main task was to create an automation system that would not require too much workforce and do the task of reviewing every comment in less amount of time, which was completed successfully.

Microsoft-Excel.....4/5  
Git.....5/5  
Data-Visualization.....3/5  
Data-Analysis.....3/5  
Machine-Learning.....2/5  
Python.....4/5

## GUI Chess at Self-Paced, Lahore

**03/2024–07/2024**

Created a GUI chess application for our semester project in OOP subject using Java Language. We created an application in which two players can play chess against each other. We presented that in our final term evaluations. I worked with my partner as a team and used Git to our advantage as we lived towns apart. Now we are modifying it so that a computer can also play.
