As a passionate and skilled MERN stack web developer, I specialize in building dynamic and responsive web applications. With a solid foundation in MongoDB, Express.js, React, and Node.js, I have hands-on experience in both front-end and back-end development. I thrive on creating user-friendly interfaces and robust server-side logic, ensuring a seamless and efficient user experience. My dedication to staying updated with the latest technologies and best practices allows me to deliver high-quality, scalable solutions tailored to client needs.

Experience

- Self-Taught MERN Stack Developer

2024- now

 - Took an online course to learn more about web development and successfully finished the course with a lot of understanding
 - Developed a Food Ordering Web Application: Built a fully responsive food ordering platform using React for the frontend and Node.js, Express, and MongoDB for the backend. The project included user authentication, order management, and a dynamic product catalog.
 - Implemented Practical Projects: Applied MERN stack principles in various projects, gaining hands-on experience in coding, debugging, and deploying applications.
 - Created a Bubble Game in JavaScript: Developed a bubble-popping game using vanilla JavaScript. Implemented game logic, collision detection, and scoring mechanisms. The project helped in honing my JavaScript skills and deepened my understanding of DOM manipulation and event handling.

Education

- Government College University

202-2023

 - Fsc Pre-engineering
- University of Lahore

2023-now

 - Bachelor of Science in Computer Sciences

Skills

- HTML5
 - CSS
 - Tailwind
 - Express JS
- Problem-solving
 - Node JS
 - React
 - Mongo DB
 - Next JS
