## SUMMARY

I am a Web Developer with expertise in modern web technologies, dedicated to developing high-quality web applications. I aim to leverage my skills to address industry challenges, and I am committed to continuous learning and professional growth. My work ethic is characterized by sincerity, transparency, and a strong eagerness to acquire new skills.

## EXPERIENCE

### Web Developer

10/2022 - Present

GlowingSoft Technologies ↗

- Evaluated technical issues in front-end development to ensure high standards of functionality, performance, and user experience across web applications.
- Worked on live, hourly projects, demonstrating flexibility and expertise in meeting evolving project demands and deadlines.
- Integrated various APIs into web applications to enhance system capabilities and ensure efficient communication between software components.
- Developed and maintained a wide range of digital solutions, including admin panels, web applications, e-commerce platforms, business websites, and dating applications.

## EDUCATION

### Computer Science

02/2018 - 05/2022

University Of The Punjab - Bachelor of Science - BS

## SKILLS

Html

CSS/SAAS

Bootstrap

Javascript

ReactJS

RTK Query / Redux

NextJS

Tailwind

Jquery

Codiegniter

## PROJECTS

---

### Real Dating Science ↗

Present

- Designed and implemented a comprehensive and visually appealing user interface, including user profiles, photo uploads, and feed interactions.
- Integrated APIs to facilitate smooth data exchange for user interactions such as ratings, messages, and chat functionality.
- Developed features for user engagement, including rating systems and real-time messaging, enhancing the app's social experience.
- Ensured a responsive design across all devices, providing a consistent and user-friendly experience for diverse screen sizes.

### WeShine ↗

- Designed and implemented an intuitive admin panel interface, facilitating efficient management of various modules including customers, agents, and bookings.
- Developed CRUD functionalities for equipment management and orders, enabling seamless updates and maintenance of system data.
- Ensured a responsive design across all modules, providing a consistent and user-friendly experience on different devices and screen sizes.

### Drinkly ↗

- Created an innovative and visually striking user interface with a focus on modern design aesthetics, enhancing user engagement and visual appeal.

### Ping My Food ↗

- Designed and implemented a fully-featured admin panel with various CRUD functionalities, allowing efficient management of orders, restaurants, and users.
- Integrated APIs to enable smooth communication between the front-end and back-end, ensuring real-time updates and accurate order processing.
- Developed responsive and interactive user interfaces, enhancing user experience and accessibility across multiple devices.

### Restonify ↗

- Designed and implemented intuitive user interfaces, improving the ease of use and efficiency of the POS system.
- Integrated APIs to facilitate seamless data transactions between the front-end and back-end, enhancing system functionality and reliability.

### Vehicle Transport Hub ↗

- Integrated APIs for seamless data exchange and collaborated with the back-end team to optimize front-end performance, resulting in a 30% reduction in page load times.
- Designed and implemented responsive user interfaces, ensuring compatibility across various devices and screen sizes.
