Summary

I'm a MERN stack developer with over two years of experience, specializing in backend development. I have a strong command of MongoDB, MySQL, Node.js, and Express.js. While my expertise lies in backend development, I am also proficient in frontend technologies, including React. I am skilled in creating robust and scalable applications, managing databases, and building seamless user interfaces

Experience

Webbuggs	March-2024-Till present
Junior MERN stack developer	Lahore

- Currently, I am building the backend for "Paint Ready," a live project
- Developed the robust backend infrastructure for an Auction System utilizing MySQL, Node.js, and Express technologies. Implemented secure authentication mechanisms using JSON Web Tokens (JWT) to safeguard the APIs, ensuring seamless and protected access to the system's functionalities
- Designed and implemented a real-time chat application using Socket.io for both the frontend and backend, ensuring seamless communication and real-time updates between users. Leveraged Socket.io's capabilities to create a dynamic and interactive chat experience, enhancing user engagement and communication efficiency
- Executed seamless API integrations using advanced tools such as Axios, CORS, Fetch, and more, ensuring efficient data communication and functionality across applications.

GCS PVT LTD	Feb-2023- Jan-2024
Software Enginner	Lahore
🔗 https://gcspvt.com/	

Worked on following projects :

- Developed a comprehensive user management system built using the powerful MERN stack (MongoDB, Express.js, React.js, and Node.js). This system offers a flexible and secure foundation for managing user account
- Developed custom Content Management Systems (CMS) tailored for managing diverse digital content including articles, blogs, images, and videos
- Did IoT Integration, seamlessly merging IoT devices with web applications to gather and analyze data, enable remote device control, and automate operations
- Successfully replicated the functionalities of popular websites like Netflix and Amazon by developing high-fidelity clones

PITB	Jan-2024- March-2024
