Education

Lahore Garrison University, BS in Computer Science   Nov 2021- present
- GPA: 3.74/4.0

Projects
- University Interlinking Networking Project(Cisco)
- Car Renting App (Android Studio Kotlin)
- Business Automation (DSA C++)

Experience

Blockchain intern, Vanar, Pakistan   July 2024- August 2024
- Building Smart Contracts
- Building Frontend with React + Vite
- Tailwind CSS
- Integration via ether.js
- Hardhat Foundry for testing and deployment

Lab assistant, Univesity of Engineering and Technology, Lahore   May 2021- Oct 2021
- Search Engine Optimization
- Lab Management
- Computer Engineering Tools Knowledge like raspberry pi

                                                                                    Oct 2001 – May 2003

Certificate

Blockchain Basics   May 2022- July 2022

Blockchain Basics

Certification for the insight & knowledge about blockchain fundaments

Personal Projects

LANDCHAIN(*Tokenizing Real Estate Dapp*)
- This project focuses on tokenizing real estate, where physical properties are represented as digital assets or NFTs (Non-Fungible Tokens). Each piece of land or property is converted into a unique NFT using blockchain technology, which acts as a digital certificate of ownership. These NFTs can be traded, sold, or transferred as whole units, offering a secure and transparent way to handle real estate transactions.

Decentralized Lottery System
- A blockchain-based lottery system that leverages the transparency, security, and decentralization features of blockchain technology to create a fair and tamper-proof lottery.

Skills

- **Languages:** C++,Solidity, C,Kotlin, JavaScript,HTML,css
- **Framework**: React
- **Tools**: Foundry, Hardhat,Remix, Metamask ,Ethers.js
