Web Developer

About Me

I commenced my web development career at my University by completing some semester projects that vary from basic to complex. Being able to code gives me freedom and I am passionate to excel and do laurels in this field.

Experience

Semester Project
Ecommerce Website (HTML, CSS only)

- We built this as a team, our main aim was to design the frontend of the website.
- It was static with various pages linked to each other.

Semester Project
JS Programs Website with a Compiler

- A simple website with various JS programs on display.
- Website also contains a compiler which runs the code.

Semester Project
Library Management using C++

- This app was written in C++.
- Users can add, delete, and update the records of the books..
