Profile

I'm a passionate UI/UX designer, creating user-centric, problem-solving digital experiences that delight users. Over 6 years, I've helped companies of all sizes to build products that are simple, beautiful, and easy to use.

I have extensive experience developing and supporting user workflows, solid UI/UX design background, strong experience using Figma to create wireframes, mockups, prototypes to communicate, develop, and challenge ideas. I've been working with e-commerce, marketplaces, SaaS projects, and as part of a cross-functional delivery team.

I've also worked as professional front end developer and designed lot of websites and mobile apps.

I believe that good results come from close collaboration, shared ambition, and mutual respect, and I love using design to make a positive impact on customers and on our shared environment.

Get in touch if you want to collaborate on your projects and be more productive in your working environment.
