As a passionate and skilled MERN stack web developer, I specialize in building dynamic and responsive web applications. With a solid foundation in MongoDB, Express.js, React, and Node.js, I have hands-on experience in both front-end and back-end development. I thrive on creating user-friendly interfaces and robust server-side logic, ensuring a seamless and efficient user experience. My dedication to staying updated with the latest technologies and best practices allows me to deliver high-quality, scalable solutions tailored to client needs.

Experience

Digital Nexus E-commerce App

- Built a fully functional e-commerce platform using the MERN stack, offering seamless product browsing, purchasing, and secure payment processing.

- Designed and developed a responsive, user-centric interface with React, ensuring an intuitive shopping experience across all devices.

- Implemented a robust back-end with Node.js, Express, and MongoDB, optimizing performance and scalability for a growing user base.

FoodDel Online Food Ordering App

- The FoodDel Online Food Ordering App is a MERN stack-based platform that enables users to browse menus, customize orders, and track deliveries in real-time. With a responsive React front-end and a secure Node.js/Express back-end, the app offers a seamless and efficient food ordering experience, supported by MongoDB for reliable data storage.
